# FASTER MAIL WANTED.

### Quick Passenger Transit, But Slow Mail Delivery.

There is a good deal of growling going on in business circles over the fact that by the latest change of the U. P. and the eastern mails, we are thrown, practically, more than a day later than before in receiving New York mail.

While, under the fast passenger train arrangement, a man may make the distance between New York and Salt Lake in a little over three days time-a letter or paper seems to take between five and six. The complaint over the matter has existed ever since the U.P changed its time of arriving here from 10 o'clock in the morning till night. Mail now arriving at night is not delivered till next day, which makes a still further delay. Inquiry develops the paradoxical fact that the delay is due to the fast time made from Omaha by the lightning train. The fast train leaves Omaha he

train. The fast train leaves Omnha be fore the arrival of the fast mail train from New York, so that mail from the points farther east than Omaba has to come on by slow train. By this means mail ! aying New York at 9 p. m., Monday, would not arrive here till Friday night, nor be delivered till Saturday

morning.
Some time ago, this would not have seemed so very slow. But having given us a taste of something better, the U. P. or postal authorities should not now re-cede. Give us quick mails along with
